

Ali Ashraf

AI Backend Developer

☎: 03111041901 | email: aliashrafabbasi3@gmail.com | portfolio: <https://ali-ashraf-portfolio.netlify.app/>

Github: <https://github.com/aliashrafabbasi> | LinkedIn: <https://www.linkedin.com/in/ali-ashraf-a29b3727b/>

Profile:

Results-driven AI Backend Developer with strong expertise in Generative AI and backend system development. Experienced in building AI-powered applications by integrating Large Language Models (LLMs) into scalable backend architectures using Python, FastAPI, and modern AI frameworks.

Skilled in designing and developing RESTful APIs, AI chatbots, intelligent automation systems, and backend workflows with clean, efficient, and maintainable code. Strong knowledge of database management including PostgreSQL, MongoDB, SQLite, and SQLAlchemy ORM.

Hands-on experience with Docker, AWS S3, and RPA (Robotic Process Automation), along with deploying and managing AI backend services. Possess 6 months of practical experience in AI backend development, focusing on AI integration, backend optimization, and intelligent data processing systems.

Passionate about exploring advanced AI technologies, backend scalability, cloud integrations, and automation solutions to build modern intelligent applications.

Technical Skills :

- Languages : Python, Javascript, Typescript
- Backend Frameworks: FastApi
- Generative: LangChain, LLMs, Prompt Engineering, RPA
- Database: Postgresql, MongoDB , Sqlite , Dynamo DB
- API Development: RESTful APIs, Pydantic, JSON
- Tools & Platforms :Git & GitHub , Bitbucket , Docker
- Frontend (Basic): HTML, CSS, Tailwind CSS, Bootstrap

Education:

- BS in Artificial Intelligence — Iqra University (2025 – 2028)
- DAE in Computer Information Technology — Aligarh Institute of Technology (2021 – 2023)
- Web Development Certification — Aptech (HTML, CSS, JavaScript, Bootstrap, PHP, Laravel, MySQL)

Experience:

- AI Backend Developer — Ignite & Infinite (5 Months): Worked on the AI-powered backend solutions using FastAPI, Docker, PostgreSQL, DynamoDB, LangChain, and RPA automation, with AWS Textract integration for OCR-based document processing and data extraction.
- Social Media Marketing Intern — Corex International (4 months)

Certification:

- Certificate in Information Technology (7-month short course)
- Labor Laws & Industrial Relations (IR)

GitHub & Portfolio:

- GitHub: <https://github.com/aliashrafabbasi>
- Portfolio: <https://ali-ashraf-portfolio.netlify.app/>

Projects:

ALFRED-X AI Chatbot:

- Developed an AI-powered chatbot using FastAPI and Groq LLMs
- Implemented prompt-based conversational logic using LangChain
- Built REST APIs for user interaction and AI response handling
- Integrated clean and scalable backend architecture
- Project link: <https://ai-chatbot789.netlify.app/>

Intellectual-AI:

- Developed a full-stack AI chatbot using FastAPI, React.js, TypeScript, and Groq LLMs
- Built scalable REST APIs with real-time streaming responses and session-based chat management
- Integrated MongoDB for conversation storage, search functionality, and chat history management
- Implemented LangChain-based AI workflows and prompt engineering for intelligent multilingual conversations

Link: https://github.com/aliashrafabbasi/Intellectual_AI.git

Lyra AI Bot:

- Designing an intelligent AI assistant with FastAPI + Groq
- Implementing modular backend architecture for scalability
- Next step Deployment
- link: https://github.com/aliashrafabbasi/LYRA_AI-BOT-Backend
